MAR 10 2011
Liberal Studies

Part II. Description of the Curriculum Change

1. New Catalog Description

IFMG 305 Micro Database Systems

3c-0l-3cr

Catalog Description: The fundamentals of database management, including different database models and database design issues, are examined. Emphasizes the use of various tools of relational database software, including report generators, screen builders, and query facilities. Design techniques and software tools are used in creating a database application. Intended as an elective for business students who are not majoring in MIS. MIS majors may not count this course towards their graduation requirements.

2. Listing of Proposed Change and Old Catalog Description

Proposed Change: Only the Prefix and Course Number are being changed.

Old Catalog Description:

IM 261 Micro Database Systems

3c-0l-3cr

Catalog Description: The fundamentals of database management, including different database models and database design issues, are examined. Emphasizes the use of various tools of relational database software, including report generators, screen builders, and query facilities. Design techniques and software tools are used in creating a database application. Intended as an elective for business students who are not majoring in MIS. MIS majors may not count this course towards their graduation requirements.

NOTE: The prefix of "IM" is not an error. This was the designation for MIS courses in the MIS and Decision Sciences Department before being changed to "IFMG." This is the designation on the Syllabus of Record that has not been updated, obviously, in many years.

3. Justification/Rationale for Change

This change is a number change only. Changing the number on this course will allow non-MIS majors in business to take this course as a major elective.

Part III. Letters of Support or Acknowledgement

Not applicable.
