College Curriculum Committee

Lawrence
College Dean

+ Director of Liberal Studies (where applicable)

*Provost (where applicable)

Part II Description of the Curriculum Change

1. The following catalog description describes IM 260 Business Computer Application Project:

IM 260 Business Computer Application Project

3c-01-3sh

Provides each student an opportunity to utilize skills and concepts presented in previous COIS courses in the planning, design, and implementation of a comprehensive case study involving computerized business applications. Students will work in teams and individually in performing tasks that are necessary to solve each problem assigned. These tasks will include systems analysis, systems design, programming, testing, and implementing and documenting simulated business problems.

Part III Rationale for Change

Because departments should regularly review their courses to see if deletions are appropriate, particularly at times of program review, the MIS Department wishes to delete IM 260 because it no longer meets the needs of students enrolled in the Computer and Office Information Systems Associate Degree program, the only remaining area where it was still an active course. IM 260 was last taught Spring, 1996.
