Graduates holding the bachelor of science degree with a major in management may find employment opportunities in both the public and private sectors. Opportunities are expected to be especially plentiful in the services sector (e.g., retailing, health care, information technology, finance, and transportation), where these degrees will be valuable.

The department offers three separate degree programs: Management, Human Resource Management, and International Business. The bachelor of science degree with a major in management offers six tracks in which students can concentrate: General Management, Supply Chain Management, Entrepreneurship and Small Business Management, Energy Management, Energy Accounting and Finance, and Professional Land Resource Management.

Management

General Management Track

While both management theory and application are taught in all of the department's majors, this track is distinguished by its emphasis on the achievement of organized goals through the efforts of organization members.

Energy Accounting and Finance Track

Students taking this track will focus on accounting, business law, and finance issues related to the energy industry.

Energy Management Track

This is an interdisciplinary track that offers an introduction to the global energy industry from a number of perspectives, including geography, geoscience, and business.

Entrepreneurship and Small Business Management Track

Students taking this track will focus on creation and operation of a small business. This track is also for graduates who will be working in small businesses where the manager often must perform several managerial roles and manage several functions.

Supply Chain Management Track

Students in this track are well-grounded in both theory and application, focusing on production, operations, quality issues, and inventory and capacity management.

Professional Land Resource Management Track.

Students taking this track will focus on economic and law issues related to the energy industry.

Human Resource Management

The bachelor of science degree program in human resource management prepares individuals in both the theoretical and applied aspects of managing the human resources function in organizations as a generalist or specialist. Students will gain expertise in areas such as job design, staffing, training, compensation, and performance appraisal.

International Business

The bachelor of science degree program in international business offers students an opportunity to acquire a thorough understanding of managing global operations in the contemporary business environment. In addition, students develop skills in a traditional functional area (finance, human resources, marketing). The combination of these two objectives enables students to successfully perform in today's competitive global economy.

Minor in Entrepreneurship for Fine Arts

This minor for nonbusiness majors program assumes no prior knowledge of business. Fine arts students are often involved in starting and running their own business, developing and starting performing groups, and developing and running nonprofit community theatres. Students will develop the skills necessary to evaluate opportunities within their industry. They will learn to 1) analyze their competition, 2) develop marketing and financial plans, 3) explain intellectual property rights, 4) negotiate contracts, and 5) write a business plan that could be used to obtain financing from banks, investors, or other sources of funding. These skills are all essential for the creation and development of new ventures. This is a joint effort of four departments and represents an 18-credit minor for fine arts majors. The program is designed to give nonbusiness majors a general background in starting and running a small business.
