**DoD CySP & CAPACITY BUILDING PROJECT INFO**

**DoD Cyber Scholarship Program**

The DoD CySP is a federally supported program to encourage the recruitment of cyber talent to support national infrastructure.

Under the leadership of the Project PI, Waleed Farag, IUP, along with a selected group of national universities, has been awarded funding in the 2019–20 academic year from the Department of Defense (DoD) in support of the Cyber Scholarship Program (CySP).

**DoD CySP Capacity Building Project**

In addition to the scholarship recruitment award, IUP received a Capacity Building award for a project titled “An Innovative Pedagogical Approach Based on Agile Methodology for Faculty Development in Cybersecurity.”

The goal of this capacity building project is to find additional ways to recruit more students to enter the cybersecurity workforce. This goal will be achieved through a unique blend of faculty development, hands-on workshops, and the continued cultivation of relationships with local community colleges. As a result, this project will hold a number of workshops at surrounding Community Colleges.

Visit the DoD CySP page for more information: www.iup.edu/DoDScholarship

**WORKSHOP ACTIVITIES**

- Introduction to the CySP Program
- Hands-on activities using the Raspberry PI
- Guest speaker presentations by security experts
- Hands-on session on Scrum Team and security of various physical systems (airport, hospitals, etc)
- Hands-on activities on threat modelling, attack trees, and misuse cases
