Medical Imaging Information

Mission

The mission of the Department of Nursing and Allied Health Professions is to define, provide, and advance the education and development of professionals within the fields of nursing and allied health. The mission of the nursing program is to provide undergraduate and graduate education for students whose academic and professional goals are directed toward a career in professional nursing. The program challenges students to develop their abilities to provide care for culturally diverse populations with changing health needs. Undergraduate students have a liberal education, are clinically competent, and are prepared to function at a beginning level of professional practice. Graduate students are prepared for leadership roles. The nursing faculty supports the expansion of nursing science through scholarly work and fosters a commitment to lifelong learning and community service.

History

Indiana University of Pennsylvania first offered the Bachelor of Science degree program in medical technology in 1968. In 1973 the respiratory care program, then known as respiratory technology, graduated its first class. Allied Health was a separate department in the university until 1989 when it merged with Nursing to become the Department of Nursing and Allied Health Professions. The gerontology certificate program was approved in 1992. Nuclear medicine technology was added to the department in 1994 and the latest change to the Allied Health Program will be the bachelor's degree in Medical Imaging with the option of 3 tracks – Nuclear Medicine Technology, Diagnostic Medical Sonography or Echocardiography. The name of the medical technology program was changed to clinical laboratory science in 2003 and back to medical technology in 2019. The most recent change, approved in 2003, was the addition of a special curriculum track for respiratory therapists who are already certified and interested in completing a Bachelor of Science degree.

There have been 199 Medical Technology/Clinical Laboratory Science graduates; 255 Medical Imaging graduates, 570 Respiratory Care graduates and 2 graduates from the Respiratory Care CRT track.

Coordinator

The allied health and gerontology programs are coordinated by a faculty member in the Department of Nursing and Allied Health Professions. The coordinator serves as the academic advisor for all students in the Medical Imaging, Medical Technology and Gerontology certificate programs as well as the pre-clinical Respiratory Care students.

Communication and Contacts

All allied health students are expected to use their IUP email address. Important and helpful information is sent to students from the coordinator, secretary, registrar and other campus offices. Assistance with the use of the IUP email system is available at 724-357-4000. The IT Support Center is in Delaney Hall, Suite G35. Hours are Monday through Friday from 7:30 a.m. to 5:30 p.m. and 8:00 a.m. to 4:30 p.m. during summer sessions, breaks, and when classes are not in session. The web address is www.iup.edu/ITSupportCenter.

Medical Imaging

The Bachelor of Science degree program in medical imaging is designed to prepare the graduate to have

- Skills in problem solving, critical thinking, and decision making
- Skills in oral and written communication
- Skills in human relations and patient services
- Familiarity of applicable medical law and ethics
- A commitment to make a significant contribution to the health care team
- An appreciation and respect for cultural diversity
- A holistic caregiver's perspective
- An understanding of departmental organization and function in relation to the healthcare delivery system as a whole
- An understanding of the value and responsibilities entailed in being a professional

The program leading to the BS degree in Medical Imaging is designed to prepare students for admission into an IUP affiliate institution focused on one of three tracks: Nuclear Medicine Technology, Diagnostic Medical Sonography (Ultrasound), or Echocardiography. This program is a 3 + 1 whereby the student spends the first 3 years at IUP taking the required math/science and liberal studies courses and then a year at an affiliate where they earn a certificate in one of the specialty diagnostic imaging programs. All the coursework at IUP is preparatory towards the final year and the requirements by the Medical Imaging profession. A C or better in the following courses is required: MATH 105, CHEM 101 or CHEM 111, ENGL 101, PHYS 111, BIOL 150, and ENGL 310 or BCOM 321. Acceptance at an affiliate school is contingent upon the student meeting the academic program requirements. At the end of their senior year, upon successful completion of the certificate program at an articulated clinical affiliate accredited within the specific discipline, 32 credits of articulated courses in the track will be transferred from the affiliate school and posted to the student's official Indiana University of Pennsylvania transcript.

Nuclear Medicine Technology

Nuclear medicine is the medical specialty that utilizes the nuclear properties of radioactive and stable nuclides to make diagnostic evaluations of the physiologic and/or anatomic conditions of the body and to provide therapy with unsealed radioactive sources. The Nuclear Medicine Technologist is an allied health professional who, under the direction of an authorized user, is committed to applying the art and skill of diagnostic evaluation and therapeutics through the safe and effective use of radionuclides. Responsibilities include, but are not limited to preparation, quality control testing and administration of radioactive compounds; execution of patient imaging procedures including computer processing and image enhancement; laboratory testing; patient interviews; instruction and preparation for administration of prescribed radioactive compounds for therapy; quality control; and radiation safety. The nuclear medicine technologist exhibits professionalism in the performance of these duties, demonstrates an empathetic and instructional approach to patient care, and maintains confidentiality of information as required. He/she applies knowledge of radiation physics and safety regulations to limit radiation exposure of the general public, patients, fellow workers, and self to as low as reasonably achievable (ALARA). Professional growth and development are achieved through appropriate utilization of technologies such as PET, cross-sectional fusion technology, and participation in medical and technical education and research to enhance the quality of patient care.

These goals and description of the profession are included in the Essentials and Guidelines for an Accredited Educational Program for the Nuclear Medicine Technologist (2017) accepted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) and other professional associations.

Upon successful completion of all degree requirements, graduates are eligible to sit for the national registry examinations administered by the Nuclear Medicine Technology Certification Board (NMTCB) and the American Registry of Radiologic Technologists (AART). In many states, certification by either one of these two national organizations are needed to apply for licensure, so the individual may legally work in that state.

Diagnostic Medical Sonography (Ultrasound)

Diagnostic medical sonography or ultrasound is a medical specialty in which allied health care professions, use specialized equipment to create images of structures inside the human body. Working under the supervision of a physician responsible for the use and interpretation of ultrasound procedures, the sonographer helps gather sonographic data to diagnose a variety of conditions and diseases, as well as monitor fetal development.

The process involves placing a small device called a transducer against the patient's skin near the body area to be imaged. A stream of high-frequency sound waves is sent into the body, then are detected as the sound waves bounce off internal structures. Different structures in the body reflect these sound waves differently. The reflected sound waves are analyzed by a computer to make an image of the structure(s) on a monitor or that can be recorded on hard copy images. These images created by sonographers help aid physicians in diagnosing and treating medical conditions in the abdomen, breast, heart and blood vessels and, more recently, in diagnosing and treating musculoskeletal problems.

Echocardiography

Echocardiography is a medical specialty in which allied health care professionals use specialized equipment to create images of structures inside the human body. These professionals use echocardiogram technology to produce images of the patient's heart. They create 2-D and 3-D pictures of the heart though the use of high frequency sound waves and special equipment. A transducer is placed against the patient’s skin by sending a stream of high frequency sound waves into the body and then detects the sound waves as they bounce off the heart. The reflected sound waves are analyzed by a computer to make an image of the structure(s) on a monitor or that can be recorded on hard copy images. The images created by sonographers help aid physicians in diagnosing and treating numerous disease processes. Sonographers are trusted members of the healthcare team and are relied upon to obtain diagnostic images that will allow physicians to provide the best possible care for their patients. Echocardiography technicians may specialize in adult echocardiography, pediatric echocardiography or fetal echocardiography.

Some responsibilities of Diagnostic Medical Sonographers and Echocardiographers include the following:

- Preparing and explaining the procedure to patients.
- Maintaining and operating sonography equipment to obtain optimal images.
- Analyzing and correlating the lab results and other imaging studies performed.
- Recognizing normal anatomy, anatomical variants, and pathological conditions found during the exam.
- Writing impressions of the findings of the exam for physicians.
- Managing the facility’s electronic health records system.
- Providing direct patient care.

Students are admitted to the Medical Imaging major as freshmen into any of the three tracks. Transfer students and those with a previous degree may also be admitted into one of the tracks. Students must meet specific academic requirements to be considered for admission to the affiliate Medical Imaging track. Admission is competitive; IUP cannot guarantee admission. Information regarding academic requirements and other special requirements for the clinical year is available in the department's office.

The Nuclear Medicine program is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology. Diagnostic Medical Sonography and Echocardiography Programs are accredited by the Commission on Accreditation of Allied Health Education Programs upon recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS).

Advising Information

The Allied Health Coordinator is the *academic advisor* for all medical imaging students.

Registration for the winter sessions and spring semester begins in mid-October. Registration for fall semester and summer sessions begins in mid-March. Schedules are available through MyIUP and are typically posted several weeks before the registration period begins.

Medical imaging students receive an *early registration time* each semester and are encouraged to take advantage of this opportunity to get the best schedule possible. Students *must schedule an appointment* to meet with the allied health coordinator each semester to discuss academic progress and plans for the next semesters. At that meeting students will receive their Alternate Personal Identification Number (PIN) needed to access the registration system. Sign up times for advising appointments are posted in early-February and early-September and advisees are *notified by email* when advising appointments begin.

While students are *in their clinical year*, advising information is typically shared by email and regular mail.

Summer Course Work

Many students find it helpful to complete one or more courses during the summer months. IUP offers a number of courses during the summer that are included in the requirements for medical imaging majors. The summer schedule is typically available for view in early October at MyIUP.

Students may also plan to take courses during the summer at other colleges or universities. This is an excellent strategy that allows students to take a lighter course load during the academic year, pursue a special area of interest, or stay on track for the clinical year. Students interested in registering for courses at other colleges or universities should follow the steps listed below:

a. Meet with the allied health coordinator to discuss options
b. Use the Online Credit Evaluation System (www.iup.edu/admissions/) to check course equivalency
c. Contact the other college or university for details about schedules, registration, tuition, etc.
d. Submit an online Application for Pre-Approval of Coursework at another College or University
(form is available at http://www.iup.edu/registrar/policies/pre-approved- coursework/)

e. Earn a C or higher grade to have credits posted to IUP transcript
f. Request an official transcript be sent to IUP Admissions Office, Credit Evaluation, 117 Sutton Hall, 1011 South Drive, IUP, Indiana, PA 15705
g. If you cannot find an equivalent course, ask the allied health coordinator about possible substitutions
h. If you plan to complete BIOL 150 Human Anatomy and/or BIOL 240 Human Physiology at another College or University you must be certain the courses are equivalent to the IUP courses. Many colleges and universities offer these courses as Anatomy and Physiology I and II. If so, you must complete both I and II at that college or university to have the courses posted to your IUP transcript as BIOL 150 and BIOL 240.

Consider Completing a Minor

With 15 credits of free electives built into the curriculum many medical imaging students consider a minor. A full listing of minors and certificates offered at IUP is a good place to begin the minor selection process. A minor in Safety Sciences is an excellent option that may improve job opportunities for graduates either upon entry into the career or at some point when the graduate is interested in exploring career advancement options. A complete list of minors and a curriculum plan for a minor in Safety Sciences is available at the back of the handbook.

Learning Support Services

Academic Support: Tips for success include

a. Get organized: Keep a detailed calendar with assignment due dates, exams, and other important dates. Block off study time and prepare for exams and assignments in advance.
b. Make academic success a priority: Do your work first and there will be plenty of time for involvement in campus, community and social activities.

Seek Help to Succeed and Excel: IUP offers outstanding academic support services that help students be successful in their classes. Meet with your professors during their office hours and take advantage of workshops, supplemental instruction, tutors, and the Writing Center.

c. Department of Developmental Studies (www.iup.edu/devstudies)
d. Writing Center (www.iup.edu/writingcenter)

Tutors are also available for chemistry, physics and math. See the Allied Health Coordinator for details.

Learn More About Medical Imaging

Program directors at Medical Imaging programs encourage students to learn about the field. Consider the following actions that will help you become acquainted with the profession:

a. Tour one or more medical imaging departments: Contact any hospital and inquire about a tour and/or shadow experience
b. Contact program directors of the affiliating schools of medical imaging for an appointment or to learn more about a specific program
c. Ask the allied health coordinator how to contact a student currently in the clinical year who is available to answer questions and offer suggestions
d. Become familiar with your future professional organizations
    i. The Society of Nuclear Medicine (www.snm.org)
    ii. American Society of Radiologic Technologists (www.asrt.org)
    iii. Society of Diagnostic Medical Sonography (www.sdms.org)

Application Process for Admission to a Medical Imaging Program

Plan to meet with the allied health coordinator during the spring semester of the sophomore year to review the application process.

The medical imaging curriculum is divided into pre-clinical and clinical study. Students typically finish the first three academic years of study on the IUP main campus. To complete the program, students enter the clinical phase of the program that is one calendar year in length.

Students will apply to The University of Findlay in Findlay, Ohio to either the Nuclear Medicine Institute (NMI), Diagnostic Medical Sonography (Ultrasound), or Echocardiography.

Students admitted to Findlay spend 4 months at The University of Findlay and study the theory of the medical imaging track. The program includes 35 weeks for Nuclear Medicine Technology track and 35 weeks of clinical practice for Diagnostic Medical Sonography and Echocardiography in one of the many affiliating sites and a return to The University of Findlay for a review week and final examination. Information on approved sites at (www.findlay.edu) provides detailed information about clinical training options.

Students admitted to the Nuclear Medicine track at CCAC spend 12 months in the Pittsburgh area. Classes are taught at CCAC's Allegheny Campus and clinical practice includes rotations in three of the 13 affiliating hospitals.

Upon graduation the students earn a Bachelor of Science degree in Medical Imaging; specific track from Indiana University of Pennsylvania.

Dr. Ryan Smith, Program Director
Nuclear Medicine Institute
The University of Findlay
1000 North Main Street
Findlay, OH 45840-3695
Telephone: 419-434-6102

Community College of Allegheny County
Allegheny Campus, Milton Hall 608
808 Ridge Avenue
Pittsburgh, PA 15212
Telephone: 412-237-2751
Email: lduke@ccac.edu
www.ccac.edu

Admission Requirements for the Certificate Program

Students will apply to the certificate program. There are specific admission requirements, deadlines and other special requirements which may include health screening, criminal record checks, personal interviews and the purchase of uniforms and/or lab coats.

Admission into the program is competitive and is not guaranteed.

All pre-clinical courses required by IUP must be completed before progressing to the certificate year.

Medical Imaging Tracks

Students must complete all course requirements set forth by IUP prior to beginning the certificate year. All medical imaging tracks require "C" grades or better in the following courses:

- MATH 105 College Algebra
- ENGL 101 Composition I
- ENGL 310 Public Speaking or BCOM 321 Business and Interpersonal Communication
- CHEM 101 College Chemistry I or CHEM 111 General Chemistry I
- PHYS 111 Physics I Lecture
- BIOL 150 Human Anatomy
- Humanities – course could be in any of the following areas: philosophy, literature, art forms (art, music, theater or other performing arts), cultural expressions, global education, ancient literature, film studies, communication studies (this would be an additional course to the speech/oral communications course that is also required), foreign language, gender studies, humanities, history, or religion
- Social Science – course could be in any of the following areas: anthropology, archaeology, behavioral sciences, criminal justice, demography, development studies, economics, education, environmental studies, geography, gerontology, international education, international relations, law, liberal arts, library science, linguistics, political science, psychology, public administration, social sciences, social work, or sociology

For the most favorable review of the application, students are encouraged to have completed all of these courses before the application deadline.

In addition, Medical imaging tracks require

- Official high school transcripts
- Current, official college transcripts
- CPR certification
- Three letters of reference
- Application fee
- Medical Terminology: The medical terminology requirement may be met in one of three ways:
    - Take BIOL 200 Medical Terminology course at IUP
    - Online Medical Terminology 101: For approximately $75 student may enroll in an online course available at https://www.universalclass.com/i/course/medical-terminology-101.htm. A copy of the certificate of completion must be forwarded directly to NMI.
    - Medical Terminology Work Book: Purchase the following text which is available through the IUP Coop Store for approximately $72.50: Leonard, P. (2013). *Quick and easy medical terminology* (7th ed.). Philadelphia: Saunders. **This book is found in the Non-required book section.**
    - You may also purchase the kindle edition e-book online from Amazon. The cost is $39.46 to purchase and $11.75 for rental.

        a. Complete all the chapter exercises and the self-test by recording your answers in the text.

        b. Give your completed text to the Allied Health Professions Coordinator for review.

c. The work will be reviewed; satisfactory completion of the requirement will be verified with the NMI program director. Ms. Kelly will send an email asking you to pick up your text from her office, 244 Johnson Hall.

The deadline for completion of the medical terminology requirement is set by NMI. However, completion of this requirement may be done well in advance of the deadline

It is recommended that this requirement be submitted at least 2 months prior to starting at the University of Findlay although this may be done well in advance of the recommended deadline.

Students are encouraged to submit applications approximately one year prior to beginning the certificate program. Application deadline for a fall class is November 1 of the preceding year. The deadline for a spring class is April 1 of the preceding year.

a. Tuition, Fees and Financial Aid

Tuition and fees for the 2020-21 NMI program is approximately $32,070.
Tuition and fees for the 2020-21 Diagnostic Medical Sonography is approximately $32,745.

During the semesters students are at the University of Findlay, IUP bills the student each semester for a $32.00 registration fee.

Students may apply for financial aid during their final year through IUP's Office of Financial Aid. Amounts of awards will vary depending on several factors, including the costs of tuition and fees required by The University of Findlay.

Students must comply with all requirements and deadlines established by the affiliating Medical Imaging program.

b. Financial Aid for University of Findlay Students

- IUP will be responsible for determining and disbursing all financial aid.
- To be considered for financial aid, students will need to complete their FAFSA by April 15th for maximum eligibility.
- Financial Aid award letters will be available at the end of June early July for upperclassmen.
- During this time is also when the bills for University of Findlay will become due.
- It is the student's responsibility to notify their schools, that they will not have their financial aid available until after the second or third week of IUP classes. (**Note:** Refunds are based on IUP's class schedule).
    - University of Findlay expects each student to provide them documentation of their financial aid at IUP. This can be done by printing your IUP award letter from MyIUP and sending it to Findlay.
- If additional financial aid is needed, please contact the IUP Financial Aid Office for information on the Parent Plus loan and alternative/private loans.
- After the student receives their refund (from IUP), it is then their responsibility to pay their bill at Findlay.
- **Note:** For students starting in the spring at Findlay for the academic portion of the program, you will receive financial aid in Spring 2021 and Fall of 2021, please plan accordingly during the summer session to cover costs.

Diagnostic Medical Sonography Programs

- 2020-21 Estimated Cost of Attendance:
  - *Tuition*** and Fees:*

$26,250	Tuition
$ 2,555	Board
$ 1,700	Housing**
$ 300	Student Activity Fee
$ 1,215	General Service Fee
$ 150	DMS Lab Fee
$ 100	Trajecsys
$ 225	ARDMS SPI Exam
$ 250	One ARDMS Specialty Exam
$32,745	Total Tuition & Fees

Nuclear Medicine Institute Program

- 2020-21 Estimated Cost of Attendance:
  - *Tuition* and Fees:*

$26,250	Tuition
$ 2,555	Board
$ 1,700	NMI Housing **
$ 300	Student Activity Fee
$ 1,215	General Service Fee
$ 50	NMI Lab Fee
$32,070	Total and Fees

Please note: These are the costs one could potentially occur during either program. This is not what is going to be billed to you from the University of Findlay. To determine what will be billed to you, contact University of Findlay's Bursar's Office.

*Tuition will be billed separately for each of the three semesters (One didactic and two clinical) at the rate of $525 per credit hour.

**While most students choose to utilize University of Findlay housing, other on-campus residence options are available for an additional fee beyond what is listed above.

***The Sonography Program tuition will be divided between 3 semesters at a rate of $525 per credit hour with a total of 50 credit hours. Students will be charged for 24 credit hours for the first semester or academic portion of the program. Students will then be billed for 12 ½ and 13 ½ credit hours, respectively, for the final two semesters in which they are in the clinical component of the program.

Additional expenses will include membership dues for one or more professional societies as well as books, transportation, etc. These costs will be determined by the University of Findlay.

d. Graduation

- Medical Imaging students graduate from IUP in August of the year their clinical experience is completed. The graduation application may be completed online at MyIUP. Applications for August graduates are due by April 1 of the graduation year.
- Students will be invited to participate in the University's commencement ceremony scheduled in December of their graduation year. Students have an option to attend the University's May commencement ceremony and the Department of Nursing and Allied Health's commencement ceremony. Details about commencement may be found at www.iup.edu/commencement.

SENIOR YEAR**

Courses are taught off campus for one calendar year at the University of Findlay for all Medical Imaging tracks or the Community College of Allegheny County (CCAC) for Nuclear Medicine Technology only. Students will not need to register for these courses. Thirty-two credits of articulated courses in the track will be transferred from the clinical affiliate and posted to the official Indiana University of Pennsylvania transcript.

IUP is affiliated with two accredited nuclear medicine technology programs. Students apply for admission to one of these programs for completion of the final year of study.

- The Nuclear Medicine Institute (NMI) at the University of Findley, Ohio: In this program students spend one semester at NMI, 35 weeks in clinical training at one of NMI's approved clinical sites and return to NMI for a final examination.
- The Nuclear Medicine Technology Department at CCAC: In this program students spend 12 months in classes at the CCAC Allegheny Campus and clinical training at various sites in the Pittsburgh area

IUP is affiliated with the University of Findlay for the Diagnostic Medical Sonography and Echocardiography programs. Students apply for admission to one of these tracks for completion of the final year of study.

REQUIRED: Global and Multicultural Awareness; two writing intensive courses

*NMI requires a C or higher grades in these courses. In addition, a C or higher grade is necessary in a Humanities and Social Science course. See reverse for details. For the most favorable review of the application, students are encouraged to have completed all of these courses before the application deadline.

*NMI requires a C or higher grade in a Humanities and Social Sciences course.

NMI defines Humanities as – Course could be in any of the following areas: philosophy, literature, art forms (art, music, theater or other performing arts), cultural expressions, global education, ancient literature, film studies, communication studies (this would be an additional course to the speech/oral communications course that is also required), foreign language, gender studies, humanities, history, or religion.

NMI defines Social Sciences as – Course could be in any of the following areas: anthropology, archaeology, behavioral sciences, criminal justice, demography, development studies, economics, education, environmental studies, geography, gerontology, international education, international relations, law, liberal arts, library science, linguistics, political science, psychology, public administration, social sciences, social work, or sociology.
