II. Approval of Minutes from October 28, 2014 Curriculum Committee Meeting

On a Mocek/Killam motion, the minutes for October 28th were approved as revised with the words “which led” being added in the Co-chair’s report paragraph 3 line 2 after “the Provost,”.

III. Co-Chairs Report

Matt Baumer will be here to discuss MUSC 140—it is intended to be a distance education course. Also there was a question from Chemistry about whether Organic Chemistry I and II can count as the 6 credits of advanced level courses. The System policy does allow for an advanced 200 level course to count. The Management course has been updated and is on the agenda again. The response to the faculty resources question for the Management new tracks has been revised. The Curriculum Streamline Proposal was moved from APSCUF Executive Committee to the Representative Council, which is meeting this Thursday.

HPED 375 Physiological Basis of Strength was supposed to include HPED 221 or BIOL 150 as the prerequisite but the proposal went through with only HPED 221. The department would like to correct this error. The committee approved this change being submitted to Senate in December.
