Liberal Studies 1

Part II. Description of Curriculum Change

1. Proposed Catalog Description:

CHEM 101 - College Chemistry I

3c-2l-4cr

Basic principles and concepts of inorganic chemistry are developed from the standpoint of atomic and molecular structure with illustrative examples from descriptive chemistry. The laboratory portion of the course illustrates physical and chemical properties in a qualitative and quantitative manner. This course is restricted to students enrolled in the Colleges of Health and Human Services, and Natural Sciences and Mathematics; others by permission. Some lecture and lab sections may be restricted to Nursing, Respiratory Care, Respiratory Therapist and Nuclear Medicine Technology majors. Some lab sections may be restricted to Nutrition and Dietetics Majors.

2. Proposed Change: Clarified intended audience, and noted that some sections are reserved for majors from the Nursing Department.

Old Catalog Description:

CHEM 101 - College Chemistry I

3c-2l-4cr

Basic principles and concepts of inorganic chemistry are developed from the standpoint of atomic and molecular structure with illustrative examples from descriptive chemistry. The laboratory portion of the course illustrates physical and chemical properties in a qualitative and quantitative manner. Designed for selected majors within the College of Health and Human Services.

3. Justification/rationale for the change.

The Registrars Office requested the clarification of the vague “selected majors” statement. CHEM 101 is a required course for a number of majors in the listed colleges, and the restriction ensures seats are available to these students. The “others by permission” ensures interested students also have an opportunity to register. For several years, the Chemistry department has been running separate lecture and/or lab sections for majors from the Nursing Department and Food and Nutrition Department, at the request of these departments.

Part III. Letters of Support or Acknowledgement
