Description of Curriculum Change Old Catalog Description

COSC 316 Cybersecurity Basics

3 class hours 0 lab hours 3 credits (3c-01-3cr)

Prerequisites: COSC 110 or equivalent programming course, junior standing or permission of instructor.

Provides an introduction to the theory and concepts of computer security in networked systems. The course will look at security issues and policies with regard to hardware, software development, databases, operating systems and networks as well as the use of encryption. The more common attacks on systems will be covered. Vulnerability assessment tools and techniques for defending systems will be explored in various projects.

Proposed Catalog Description:

COSC 316 Host Computer Security

3 class hours 0 lab hours 3 credits (3c-01-3cr)

Prerequisites: COSC 110 or equivalent programming course, junior standing or instructor permission

Provides an introduction to the theory and concepts of computer security. The course looks at security issues and policies with regard to hardware, software development, databases, operating systems and the use of encryption as they refer to host computers. The more common attacks on host computer systems are covered. Vulnerability assessment tools and techniques for defending host computer systems are explored in various projects.

Listing of the Proposed Change:

Current Catalog Description:

COSC 316 Cybersecurity Basics

Proposed Catalog Description:

COSC 316 Host Computer Security

Catalog Description Change:

Minor changes made in catalog description to reflect the removal of network systems.

Justification/Rationale for COSC 316 Name Change:

To make course name properly reflect course contents and objectives and to avoid confusion with the COSC 356 Network Security course.
