Department of Geography and Regional Planning: Program Revision Part II. Track Change: Bachelor of Science Regional Planning/Land Use Planning and GIS Track

1. Catalogue Description:

The Land Use Planning and Geographic Information Systems Track prepares students for employment as professional planners adept at applying advanced techniques for the development of livable communities. Data collection, spatial information management, and graphic presentation are integral skills taught in the program. Their coursework would also equip them for facilities planning and management, remote sensing applications in planning, and site location analysis. Coursework includes methods for identifying, modeling, and analyzing the spatial organization of community systems from both practical and theoretical perspectives. Students in planning graduate with a working knowledge of subdivision, land use and zoning regulation. They are familiar with strategies of economic development. They understand both the theory and ethics of planning. Students completing this track should be able to assist diverse communities and organizations in identifying and finding solutions to a wide variety of land use, siting, and transportation problems.

| Bachelor of Science-Regional Planning/Land Use Planning and GIS Track Liberal Studies: As outlined in the Liberal Studies section with the following specifications: Mathematics: MATH 217 recommended Liberal Studies Electives: 9cr BTED/COSC/IMFG 101 recommended, no courses with RGPL prefix College: Foreign Language Intermediate Level (1) Major: RGPL 213 Cartography I RGPL 213 Cartography I RGPL 214 Introduction to Geographic Information Systems RGPL 316 Introduction to Geographic Information Systems RGPL 320 Introduction to Planning 3cr RGPL 321 Planning Methods 3cr RGPL 322 Planning Methods 3cr RGPL 412 Community Planning Practicum 3cr RGPL 412 Community Planning Practicum 3cr RGPL 423 Planning Design Studio I 3cr RGPL 443 Planning Design Studio II 3cr RGPL 458 Land Use Law 3cr RGPL 458 Land Use Law 3cr RGPL 464 Land Use Policy RGPL 464 Land Use Policy RGPL 469 Internship 3cr RGPL 489 Internship 3cr RGPL 480 Planning Theory 3cr RGPL 481 Political Geography RGPL 312 Cartography II 3cr RGPL 313 Cartography II 3cr RGPL 314 Map and Photograph Interpretation RGPL 315 Remote Sensing RGPL 417 Technical Issues in GIS Tetal Design Regulation and Silver Internation Interpretation Tetal Design Regulation II Tetal Design Regulation II | |

2b. List of all associated changes.

Addition of RGPL 410 Community Participation and Civic Engagement Seminar as a required course.

Addition of Portfolio requirement for graduation.

Change GEOG 412 Research Seminar to RGPL 412 Community Planning Practicum.

Change RGPL 453 and RGPL 454 Planning Design I and II to RGPL 453 and 454 Planning Design Studio I and II.

Add GEOG 334 Political Geography and PLSC 376 Public Sector Budgeting and Financial Management as options under controlled electives for this track.

Change RGPL 453 and RGPL 454 Planning Design I and II to RGPL 453 and 454 Planning Design Studio I and II.

Change: GEOG 341Climatology, GEOG 342 Physiography, GEOG 343 Geography of Fresh Water Resources, and GEOG 440Conservation: Environmental Analysis to RGPL 341Climatology, RGPL 342 Physiography, RGPL 343 Geography of Fresh Water Resources, and RGPL 440 Conservation: Environmental Analysis.

3. Rationale for changes.

As part of an on-going effort at self-assessment and continuous improvement, the Regional Planning program of the Geography and Regional Planning Department during the Summer of 2010 invited an outside evaluator to assess the strengths and weaknesses of the program and concomitantly the department's chances of successfully becoming an "accredited" planning program. Accreditation of planning programs is done by the National Planning Accreditation Board. The board is composed of members of the American Institute of Certified Planners, the American Collegiate Schools of Planning, and the American Planning Association. Accreditation brings national recognition and ongoing external evaluation; it requires significant continuing education for faculty and immediately improves the employability of our graduates. At present there is only one accredited planning program in Pennsylvania: The University of Pennsylvania.

In her pre-evaluation of the Bachelor of Science, Susan Bradbury, AICP, concluded that:

"I think you have a real potential for growth. If you are accredited you have a unique market area and your specializations are very appropriate "

In spite of an overall positive report, Dr. Bradbury recommended some curricular changes to both focus the program and to bring it into compliance with PAB standards. Planning is an applied discipline and although much of our curriculum involves service learning and real world project, the names of courses did not reflect this. For this reason RGPL 453 and 454 Design I and II have had the world "Studio" added. This is common practice in planning and necessary to present the appropriate and accurate image to the accreditation board. Similarly, RGPL 412 Research Seminar, has been retitled Community Planning Practicum. The course description already requires an applied research project, but the name change highlights this.

Two courses have been added as required core courses. The one significant gap in the curriculum identified by Dr. Bradbury was a course that taught the important community involvement techniques required of practicing planners. For this reason RGPL 410 Community Participation and Civic Engagement Seminar is added. It seems obvious that environmental planners should have a course in environmental planning. RGPL 425 Environmental Planning was added to the track only as a required course for that reason. Both of these courses have been taught successfully as RGPL 481 courses and were under consideration by the department as gaps in any cases.

As planners are deeply involved in program and capital budgeting at the municipal and county level PLSC 376 is strongly recommended.

Climatology, Physiography, Geography of Freshwater Resources, and Conservation have already been crosslisted in the catalog, but the prefixes were not changed in the program listing.

Although the department covers some of the course work necessary to understand physical processes, we felt that a stronger background in biological processes and environmental biology would strengthen the credentials of an environmental planner. For that reason BIOL 103 and 104 have become recommended Natural Science Laboratory courses for the environmental track only and BIOL 114 has been added as a recommended free elective.

The portfolio requirement is an outgrowth of the current emphasis in higher education on outcomes assessment. It requires no real additional work by our majors, but they will be on notice that they must compile their significant course work as they proceed through the program.

III. Implementation

- 1. Students already in the program or entering this year will be given the option of finishing under the present requirements. All new students new to the program in 2011-12 will be expected to follow the new curriculum.
- 2. Faculty resources are adequate; both new courses have been taught as RGPL 481 within the past year without needing additional resources or endangering the curriculum. No new physical resources will be required.
- 3. One of the strong rationales for seeking accreditation, the driving forces behind these changes, is to increase the visibility and enrollment in our planning program. At present some of our upper-level planning courses are under-enrolled. The strategy we are following mimics that of Missouri State University that doubled its planning majors after receiving accreditation. The demand for public and private sector planners both regionally and nationally is growing and accreditation gives a strong advantage to our graduates.

IV. Periodic Assessment

- 1. The Department of Geography and Regional Planning engages in constant quality improvement. In addition to the 5-year planning cycle mandated by the University, we hold annual retreats to review enrollment, curriculum, and external context. The curricular changes proposed here are the result of an external evaluation completed during the Summer of 2010. During the 2010-2011 school year, in preparation for an external evaluation team, we will do a program self-study. During the 2011-2012 school year a team of external evaluators will do an accreditation study. Accreditation mandates ongoing internal evaluation and 5-year external reviews. Criteria are complex, but include: student interviews, an advisory board of program graduates that meets annually, consulting with professional planners, and using student learning outcomes to measure the program against national curricular and performance standards.
- 2. Internal evaluations are on-going with annual reports. External evaluations are every 5 years.
- 3. Internally the Planning Program faculty and the Planning Advisory Board made up of professional planners review the program annually; we have had two external evaluators in the past for years and are preparing for the Planning Accreditation Board review described above.
