### b. List of all associated course changes

The total number of credits for the minor has been increased to 18 hours. In addition to the already existing requirements, students will select an additional Psychology laboratory course to fulfill the minor. The additional laboratory course may be a content-based lab or an additional research methods lab. The footnote referring to a content-based laboratory course has been

deleted, as the Psychology Department only offers one other laboratory course that is not defined as a content-based lab (i.e., PSYC 291 Research Design and Analysis II), so students will automatically take at least one additional content-based laboratory course to fulfill the new minor requirements. The provision that at least 6 credits must be 300-level of above was added to ensure the minor is consistent with the PASSHE Board of Governors Policy.

#### c. Rationale for change

The total number of credits required for the minor has been increased to 18, with at least 6 credits from courses that are 300-level or above, to comply with the PASSHE Board of Governors Policy. In requiring students to take one additional laboratory course, students will develop a more robust and useful understanding of the scientific basis for the discipline of psychology as they fulfill the requirements of an 18-credit minor.

#### Part III. Implementation

#### 1. How will the proposed revision affect students already in the existing program?

Students already enrolled in the minor will not be required to adhere to this curriculum change. The curriculum change will apply to students who begin their education at IUP after the program revision goes into effect. Students will adhere to the program description noted in the Undergraduate Catalog from their respective entrance year.

#### 2. Are faculty resources adequate?

Yes

#### 3. Are other resources adequate?

Yes

# 4. Do you expect an increase or decrease in the number of students as a result of revisions? If so, how will the department adjust?

We expect no significant change in the number of students enrolled in the Psychological Science Minor. This minor has historically graduated significantly fewer students in comparison with the Psychology minor.

#### Part IV. Periodic Assessment

#### 1. Describe the evaluation plan.

As this is a revision of an existing program, the same due diligence regarding review and evaluation will continue.

#### 2. Specify the frequency of evaluations.

Every five years, the Psychology Department undergoes a review process. The utility, scope, and value to students of the minor will be reviewed during the 5-year review process.

#### 3. Identify the evaluating entity.

All course, curriculum, and program issues are handled by the Psychology Department Curriculum Committee with input from the faculty, students, administration, and external reviewers who participate in the 5-year review process.

# Part V. Course Proposals

No new courses are being proposed.
