Course Deletion: SAFE 301 Health Hazard Recognition

Part II. Description of the Curriculum Change

1. SAFE 301 Health Hazard Recognition is being deleted from the Safety Sciences B.S. Curriculum.
2. Justification/rationale: With the 2005 revision in the B.S. Program in Safety Sciences there was a change from three industrial hygiene courses (SAFE 301, 303 & 402 - 9 credits) to two industrial hygiene courses with labs (SAFE 320 & 420 - 8 credits). Specifically, the recognition of health hazards was covered in SAFE 301, the control in SAFE 303 and the evaluation in SAFE 402. This three course sequence created overlap and department faculty believed it was more efficient to address the recognition, evaluation and control of health hazards together in two courses. The two courses were divided based of chemical, physical and biological hazards. SAFE 320 will focus on the chemical hazards while SAFE 420 will focus on the physical and biological hazards.
3. The three courses (SAFE 301, 303 and 402) were not deleted earlier because students in the old program had to take these courses and they were offered until the spring 2008 semester. During the spring 2008 semester, SAFE 330 was offered for the first time and in the fall 2008 SAFE 430 was offered. Therefore, there is no longer a need for these three courses and they are being deleted.

Part III. Letters of Support or Acknowledgement

These course changes will not affect other departments, therefore letters of support from other departments were not obtained.
